

EX CORNER FLAMMABLE SAFETY CABINET**WA810300C**

It has acquired FM & CE Certification and is in strict comply with FM Approval Standard for Storage Cabinets (Flammable and Combustible Liquids) Class Number 6050, OSHA 29 CER 1910.106 of American Occupational Safety and Health Administration, NFPA CODE30 of American National Fire Protection Association and Hazardous Chemicals Control Ordinance of State Bureau of Safe Production Supervision and Administration

The ex corner flammable liquid safety storage cabinet produced by SYSBEL is welded into a double wall structure by 18-Gauge CR Steel, The cabinet structure is stable and durable, it is used to store a variety of flammable liquid chemicals and is suitable for storage of most flammable liquids. The ex corner safety cabinet is suitable for storage space-constrained places, maximizing the use of spare corners as storage space. It is convenient to place chemicals at work and improve work efficiency. The flammable liquid safety storage cabinet can be standardized and managed in a structured manner. It can store flammable liquids of different natures and dangerous levels to effectively prevent and reduce the risk of human or natural disasters.

Features:

1. The cabinet adopts 18-Gauge CR Steel, and the spot-welded structure double-layer steel plate has 38mm insulation layer in the middle, which has excellent fireproof and heat insulation ability;
2. the shelf can be adjusted to meet the diverse choices of users;
3. The ex corner safety cabinet has the same performance as the classic safety cabinet;
4. The ex corner safety cabinet is suitable for the place where the storage space is cramped, and the spare corner is maximized for use as the storage space;
5. The cabinet is provided with ventilation holes, which can be connected to the ventilation system;
6. using three-point linkage type door lock, can ensure the storage safety inside the cabinet;
7. Safety padlock configuration, realize double-double lock management, in line with China's "Hazardous Chemicals Safety Management Regulations" (December 1, 2011 edition);

Product details

Adjustable shelves with anti-leakage design

Shelf bracket welded on both sides of cabinet

FM Approved Anti-Static Device: Conductor grip combine the equipment with the cabinet to conduct the static to earth, thus to prevent fire accident

18Ga(1-mm) quality galvanized steel
Unleaded coating with polish surface, which is corrosion and moisture proof

Fireproofing vents to effectively reduce the concentration of volatile substances, and prevent fire hazards. Special spill-proof shelves to avoid chemical leakage by accident.

The cabinet has three-point linkage lock, and the door can open 180°
Two person management in line with Hazardous Chemicals Control Ordinance (December 1st, 2011 Version)

The three-point bullets: Anti-static design structure
